In the past, when Ter Beke was pursuing strong top-line growth, it was achieved at the expense of EPS growth. This was illustrated by the signing of poorly-priced ready meals contracts in 2006 in an effort to gain market share in France. But by the end of 2007, the group began a process of self-examination that was intensified with the appointment of Marc Hofman as CEO, who quickly set about achieving his primary goal of improving ROCE and significantly reducing debt. The group is also now increasing its focus on product innovation. In three years from now, 25% of sales should be generated by new products. The 1H09 results illustrate that the group is on the right track. We therefore upgraded our rating from Hold to Accumulate and our target price from €45 to €55. The latter is based on an EV/EBITDA for 2009 of 4x for Processed Meats and 6x for Ready Meals. Our EPS forecasts for 2009, 2010 and 2011 have been raised by respectively 20%, 18% and 21%.

### HIGHLIGHTS

- **Solid 1H09 results.** Net profits rose by 63% on the back of almost flat sales, a 27bps REBIT margin improvement, a positive foreign exchange hedging result and a lower tax rate. This performance is reassuring because the weakening of the £ put a €1m dent in REBIT. Moreover, the group's gearing level fell from 89% at the end of 2008 to 81% on 30 June 2009.
- **Outlook FY09.** Sales momentum should remain sluggish in 2H09 as a result of lower selling prices. The negative impact of discontinued volume contracts should fade however. Barring unexpected market conditions, management expects the improving REBIT trend to continue in 2H09. REBIT rose by €0.66m in 1H09 and we are forecasting a €0.87m improvement for the full year. Net debt should fall further thanks to a disciplined investment strategy and free cash flow generation. Net capex is set to drop from €18m in 2008 to €15m in 2009. The REBIT margin should continue to improve over the coming years, thanks in part to lower depreciation as a % of sales.

**BUSINESS DESCRIPTION**

Ter Beke is a producer of chilled ready meals and processed meats. The group is Europe’s leading producer of fresh lasagne and the second largest processed meat slicer and pre-packer, after German player Kemper. Ter Beke’s 9 factories are located in Belgium, the Netherlands and France. The processed meat products are mainly sold in the Benelux and the UK, while the ready meals are sold throughout Europe. Ter Beke is the leading processed meat producer in Belgium. The main consumer brands are Come a Casa (chilled ready meals) and l’Ardennaise (processed meats). Customers include supermarket and hypermarket chains, wholesalers and foodservice companies.

## STRATEGY

Ter Beke's strategy is based on four pillars:

- Growth
- Operational excellence
- Cost leadership
- Product innovation

In the short term, Ter Beke aims to increase its production capacity utilisation. For example, there is scope to increase output at the Belgian ready meals factories without extra investment by optimising production allocation. The processed meat product range for the UK clients is being enlarged. In 2010, growth should come from quality upgrades in ready meals and new fresh pack concepts. Ter Beke is already passing on lower raw material prices to its customers through quality upgrades. Beyond 2010, growth will come from new-generation ready meals and packaging. Ter Beke's expertise in slicing and packaging could be used for other products, which could create new business opportunities for the group.

Optimisation of production allocation should lead to further margin improvements. For example, the ready meals' plant at Wanze will increasingly be used for large runs while the Marche-en-Famenne site is specialised in more complex runs. The three processed meat slicing sites and the three distribution centres in the Netherlands are being integrated into two sites (Ridderkerk, Nijmegen). Early this year, Ter Beke signed a contract with Warehouse De Pauw (WDP), a Belgian real estate group, which will construct a state-of-the-art logistics platform. It will centralize Langeveld/Sleegers meat slicing activities and Ter Beke's logistics for processed meat and ready meals in the Netherlands. The new site covers 25,000m<sup>2</sup> with a soon-to-be developed surface of 13,000m<sup>2</sup>. Ter Beke will rent the site for 15 years from 1 October 2010 onwards.

In three years time, 25% of sales should be generated by new products. In order to achieve this goal, new products are being developed. The group will also look at acquisitions in order to reduce the time to market.

## FINANCIALS

Ter Beke's increased focus on production and supply efficiencies and debt reduction is starting to pay off. The termination of unprofitable contracts and lower selling prices led to a 0.4% decline in sales during 1H09 but the REBITDA margin improved by 40bps despite a negative impact of €1m from the weaker £ and higher wages pursuant to the Belgian collective labour agreements. The positive impact from weaker raw material prices was limited because most of the decline was passed on to clients. Net financing costs also fell by €1.4m in 1H09 thanks to a €0.7m hedging gain related to the £ and non recurring interest income on tax receivables. Note that the 1H08 net financial result included a €0.3m hedging loss. The tax rate fell from 26.3% in 1H08 to 23.3% in 1H09 as a result of the changed treatment of the captive reinsurance structure after the group won its legal dispute with the tax authorities last year. Net profits rose by 63% from €2.72m in 1H08 to €4.42m.

\* Fully diluted

The group's net debt dropped to €63.8m at the end of 1H09, implying gearing of 81%. This compares with €70m at the end of 2008. The reduction is mainly the result of a decrease in "other receivables". Net debt is expected to decline further during the course of 2H09. We are forecasting €61m for the end of the year for a gearing level of 74%. Management indicated that capex should amount to +/- €15m annually in 2009-2011, down from €18-20m during the last few years. Capex reached €8.5m during 1H09. It was mainly related to slicing lines and slicing infrastructure. Trade and other receivables declined by €9m from €59m at the end of 2008 to €50m at the end of June 2009. Half of the decrease is due to seasonality. The remainder reflects the cashing in of tax receivables and lowered receivables for reps and warranties related to the Berkhout acquisition.

Until the appointment of Marc Hofman as the group's CEO, Ter Beke was pursuing an aggressive growth strategy in France that led to margin erosion, galloping debt and EPS dilution. Since the end of 2007, the strategy has shifted towards restoring profitability in France, prudent growth and net debt reduction. The group is now clearly on the right track.

**PROCESSED MEAT**

Sales rose by 1.8% in 1H09 despite the weaker £ and lower selling prices as Ter Beke passed on falling raw material prices. Divisional REBITDA and REBIT margins improved by respectively 68bps and 27bps. About 50% of divisional sales are insensitive to fluctuating raw material prices thanks to the growing importance of service activities (slicing and pre-packaging for third parties). The pre-packaged meat products continue to gain market share to the detriment of over-the-counter products. Supermarket chains are increasingly outsourcing slicing and packaging.

READY MEALS

Sales declined by 4.7% following the termination of unprofitable volume contracts in France and weaker selling prices. The REBITDA and REBIT margins improved by respectively 170bps and 191bps thanks to contract portfolio optimisation and cost control.

**DISCLOSURE & DISCLAIMER SECTION**

The company disclosures can also be consulted on our website <http://www.kbcsecurities.be/disclosures>.

KBC Securities uses an absolute rating system including terms such as Buy, Accumulate, Hold, Reduce and Sell (see definitions below).

	Definition
BUY	Expected total return (including dividends) of 10% or more over a 6-month period
ACCUMULATE	Expected total return (including dividends) between 0% and 15% over a 6-month period
HOLD	Expected total return (including dividends) between -5% and 5% over a 6-month period
REDUCE	Expected total return (including dividends) between -15% and 0% over a 6-month period
SELL	Expected total return (including dividends) of -10% or worse over a 6-month period

Due to external factors and in exceptional cases, KBC Securities allows the use of ratings such as Accept the Offer, Black Out, No Recommendation or Suspended.

Our analysts assign one of those ratings based on their investment outlook and valuation for the concerned stock. The valuation can be based on different methodologies such as DCF (discounted cash flow), absolute multiples, peer group multiples, sum-of-parts or NAV (Net Asset Value). The valuation is reflected in a 6-month target price. Occasionally, the expected total return may fall outside of these ranges because of price movement and/or volatility. Such deviations will be permitted but will be closely monitored. Investors should carefully read the definitions of all ratings used in each research report. In addition, since the report contains more complete information concerning the analyst's view, investors should carefully read the entire report and not infer its contents from the rating alone. KBC Securities discloses the recommendations of its reports to the issuers before their dissemination. In case the recommendation has been amended following this disclosure, such amendments will be indicated in the concerned report.
